

Weekly Report

10/19/2015-10/25/2015

Research

This week, I attend cncc2015 in HEFEI. Machine Learning widely used in Microsoft's Oxford Project. Speech recognition is more challenging than picture and words because of the ambiguity and complexity of semantics. Also, I realize a lot of new knowledge in CNCC.

Plan for next week

- Participate In Zhaosong Huang's project. I will talk with Feiran Wu and make a detailed plan next week.
